

Serializable

Cloneable

quasylab.sibilla.core.network.NetworkInfo

```
graph BT; subgraph Interfaces; direction LR; S[Serializable]; C[Cloneable]; end; subgraph Class; direction TB; NI[quasylab.sibilla.core.network.NetworkInfo]; end; NI --> S; NI --> C;
```

The diagram illustrates a class hierarchy. At the top, two interfaces are shown: 'Serializable' and 'Cloneable'. Below them, a class named 'quasylab.sibilla.core.network.NetworkInfo' is shown. Two arrows point from the 'NetworkInfo' class box up to the 'Serializable' and 'Cloneable' interface boxes, indicating that 'NetworkInfo' implements both interfaces.
