

Serializable

Cloneable

quasylab.sibilla.core.network.NetworkInfo

```
graph BT; NetworkInfo[quasylab.sibilla.core.network.NetworkInfo] --> Serializable[Serializable]; NetworkInfo --> Cloneable[Cloneable];
```

The diagram illustrates a class hierarchy. At the top, two boxes represent interfaces: 'Serializable' on the left and 'Cloneable' on the right. Below them, a single box represents the class 'quasylab.sibilla.core.network.NetworkInfo'. Two arrows point from the 'NetworkInfo' box up to the 'Serializable' and 'Cloneable' boxes, indicating that 'NetworkInfo' implements both interfaces.
